

Meeting Summary

Date: 4/23/2020

Time: 2pm to 2:15pm

Participants: Stephanie Petronella and Cassandra Companion

Discussion:

What we should be working on this cycle

Decisions:

- Decided to focus on finishing and polishing feature 6 (the multiple track selection feature), especially since this would be a precursor feature to the desired feature that allows users to submit and play on their own tracks or tracks of others.
- Decided that testing should be done for the car motion feature.
- Decided to continue working on the features we were working on and to not work on any completely new features because we need to focus on exporting the game.
